About these numbers

The five daily tiles read Helpshift's agent analytics and the monthly and hourly charts read its per-issue analytics, the same sources the Sigma report used. The Waiting on Agent table is a count of the state at generation time. Recent months can sit slightly above a Sigma export taken earlier because issues keep being resolved. "Monthly Average TTFR" and the "TTFR" table are kept as Sigma built them: minutes from creation to resolution, not first response.

Snapshot from run 2026-10-09T1549Z, generated 2026-10-09T15:49:26Z from commit af0c0668. The numbers were read from Snowflake once, when this page was generated, and never refresh.
